Story of the Opera.

"And if you look wistfully at these ships far off and out at sea with the sun upon their sails, and wonder what quaint mysteries of life they hide, verily you are not far from being affected or elected unto the Romany. And if, when you see the wild birds upon the wing, wending their way to the south, and wish that you could fly with them, anywhere, anywhere over the world and into adventure, then you are not far in spirit from the kingdom of Bohemia and its seven castles, in the deep windows of which Æolian harps sing forever. Now, as you wander along, it may be that in the wood and by some grassy nook you will hear voices, and see the gleam of a red garment, and then find a man of the roads, with dusky wife and child. You speak one word, 'Sarishan!' and you are introduced. These people are like birds and bees, they belong to out-of-doors and nature. If you can chirp or buzz a little in their language and know their ways, you will find out, as you sit in the forest, why he who loves green bushes and mossy rocks is glad to fly from cities, and likes to be free of the joyous citizenship of the roads, and everywhere at home in such boon company."

("The Gypsies," C. G. Leland.)

The story at the base of "Manru" is romantic in character and scene, and tragical in outcome. In a general way it illustrates that irrepressible desire on the part of the

Gypsy to wander which Mr. Leland has characterized in his books on the Romanys; also, in an allegorical way, the contest supposed to exist between the artistic and domestic natures. The plot was borrowed from a Polish romance. *Manru* has won the love of a fair Galician maiden, *Ulana*, and married her Gypsy fashion. After a space she returns to her native village among the Tatra Mountains to seek her mother's forgiveness and help. She receives, instead, the contumely of the villagers and a mother's curse. Her former friends taunt her with a song which tells of the inconstancy of all Gypsies under the influence of the full moon. Having already observed signs of uneasiness in her husband, *Ulana* seeks the help of *Urok*, a dwarf, who has the reputation of being a sorcerer, and who loves her. From him she obtains a magic draught, and by its aid wins *Manru* back to her side for a time. Alone among the mountains, however, the baleful influence of the moon, the charm of Gypsy music, and the fascinations of a Gypsy maiden, break down his better resolutions, and he rejoins his black-blooded companions. *Oros*, the Gypsy chief, himself in love with the maiden, *Asa*, opposes *Manru's* rehabilitation in the band, but through the influence of *Jagu*, a Gypsy fiddler, is overruled, and *Manru* is made Chief in *Oros's* stead. *Oros* takes his revenge by hurling his successful rival down a precipice, a moment after the distraught *Ulana* has drowned herself in a mountain lake.

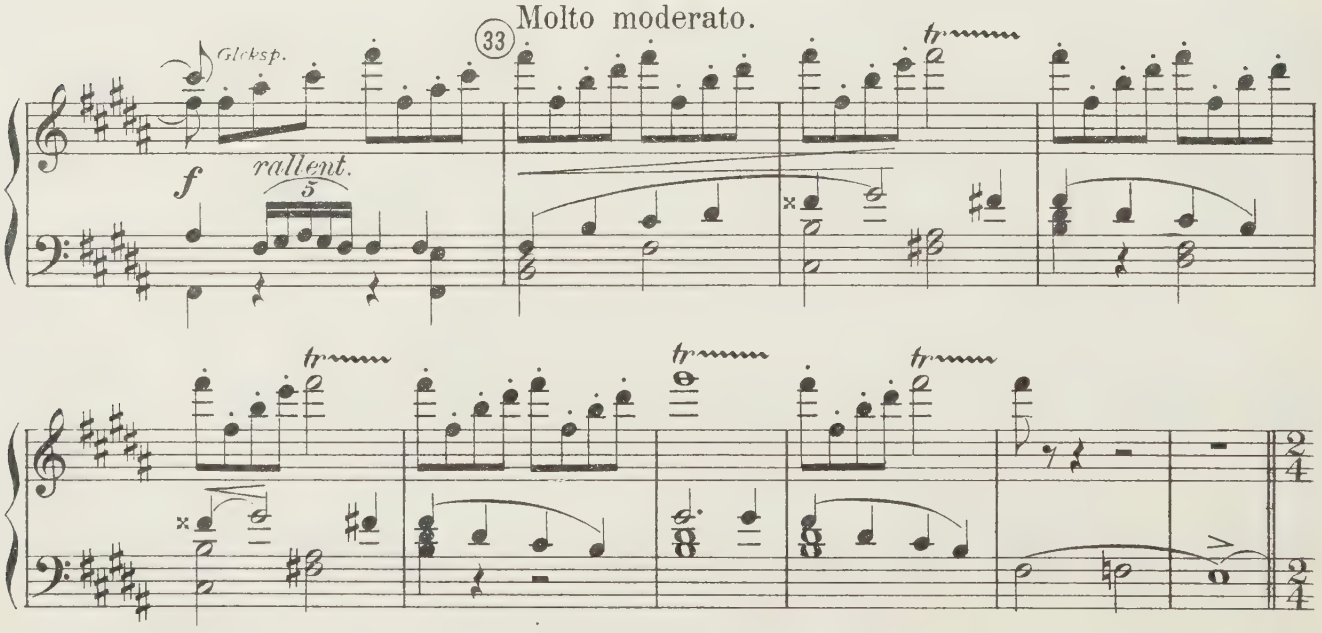
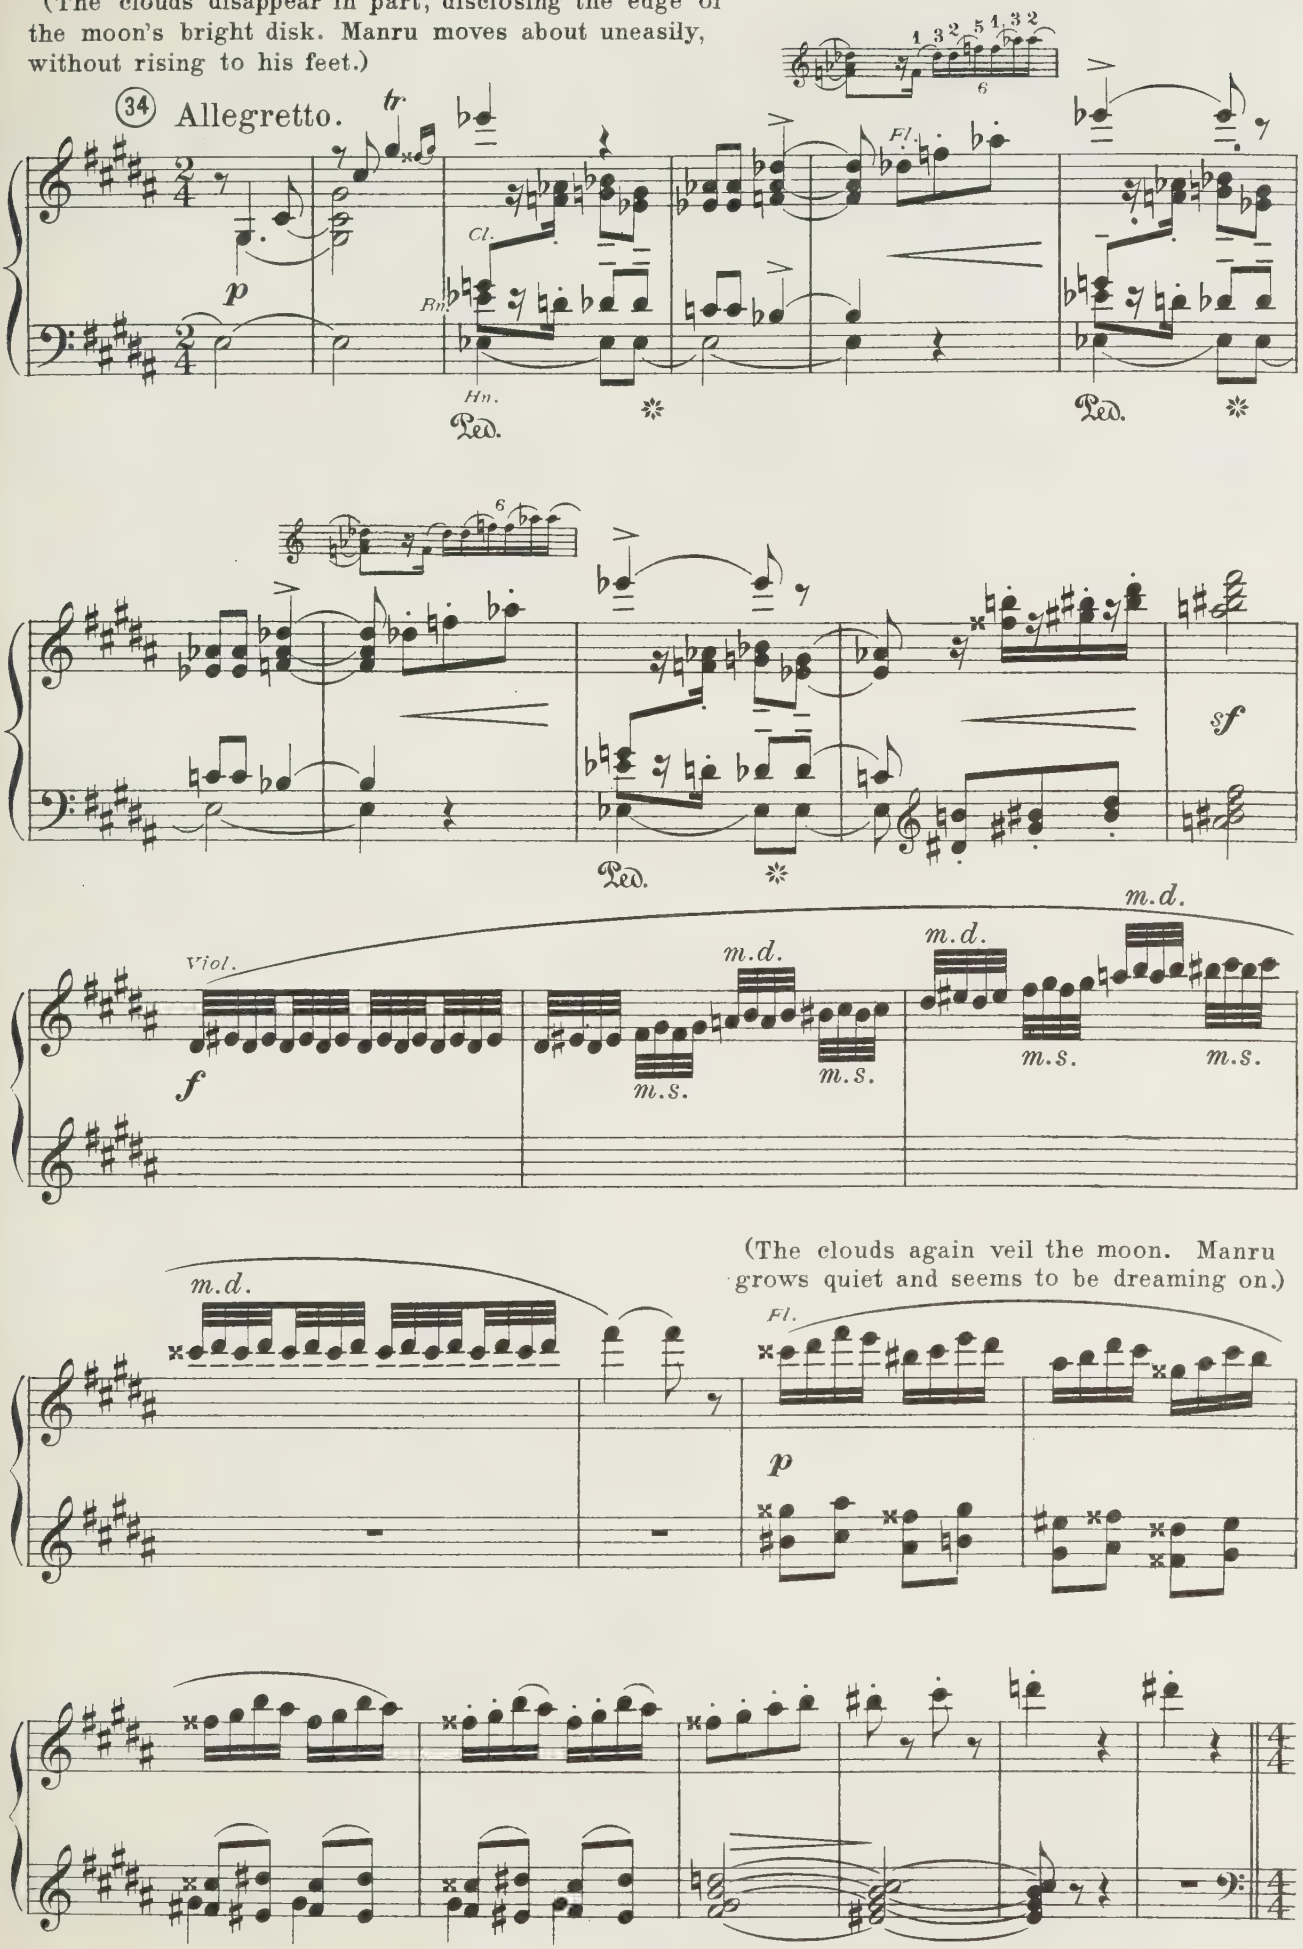
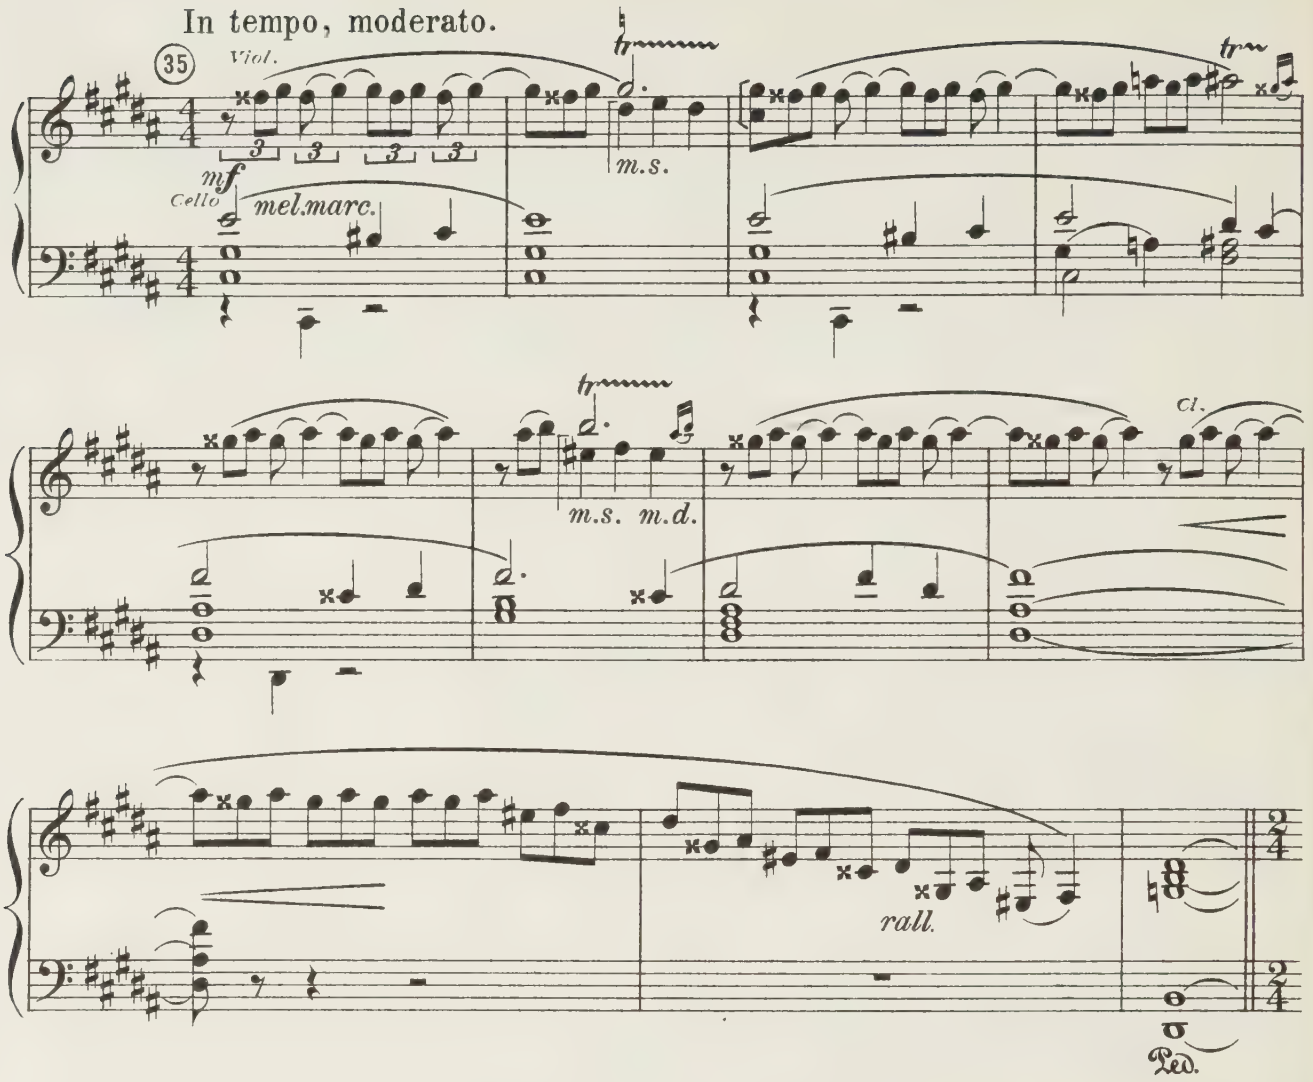
Molto moderato.

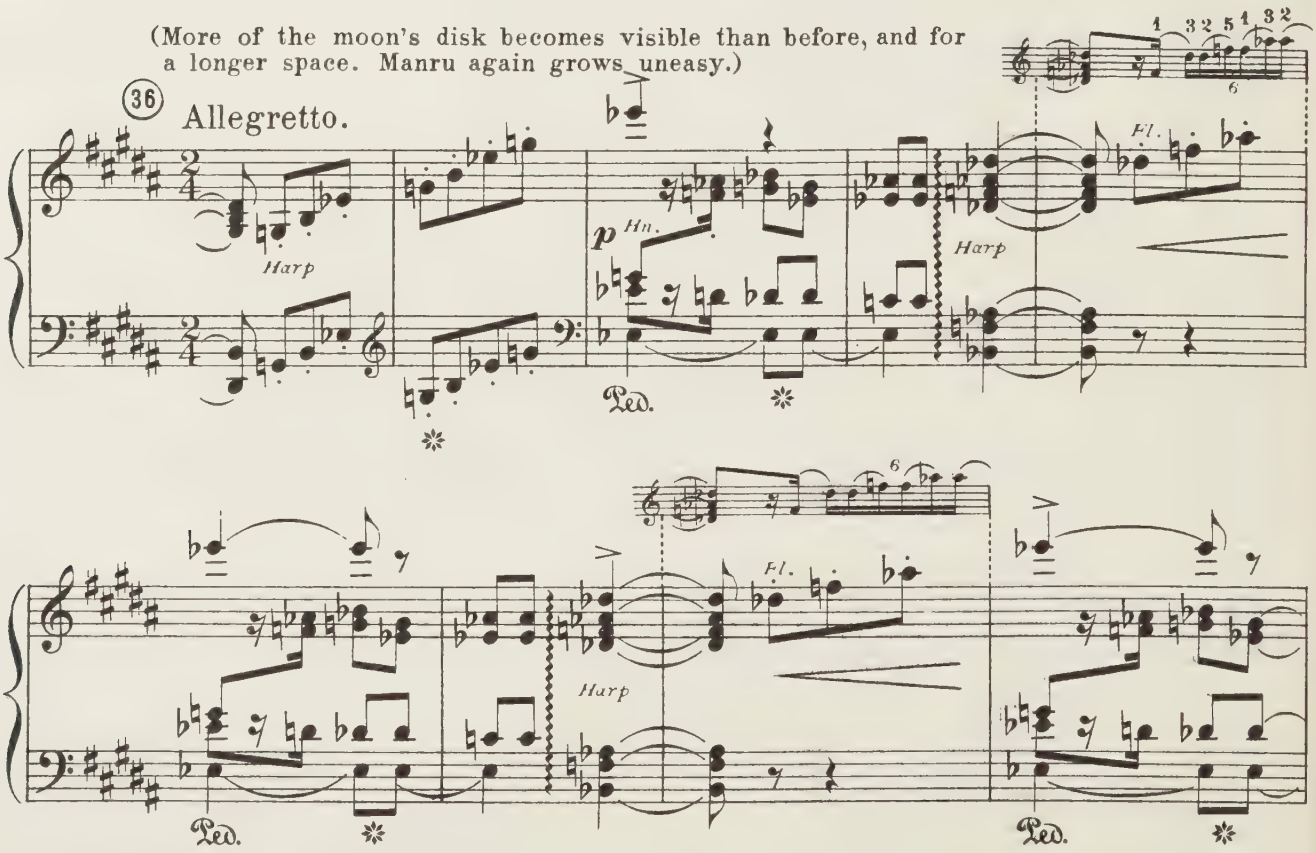


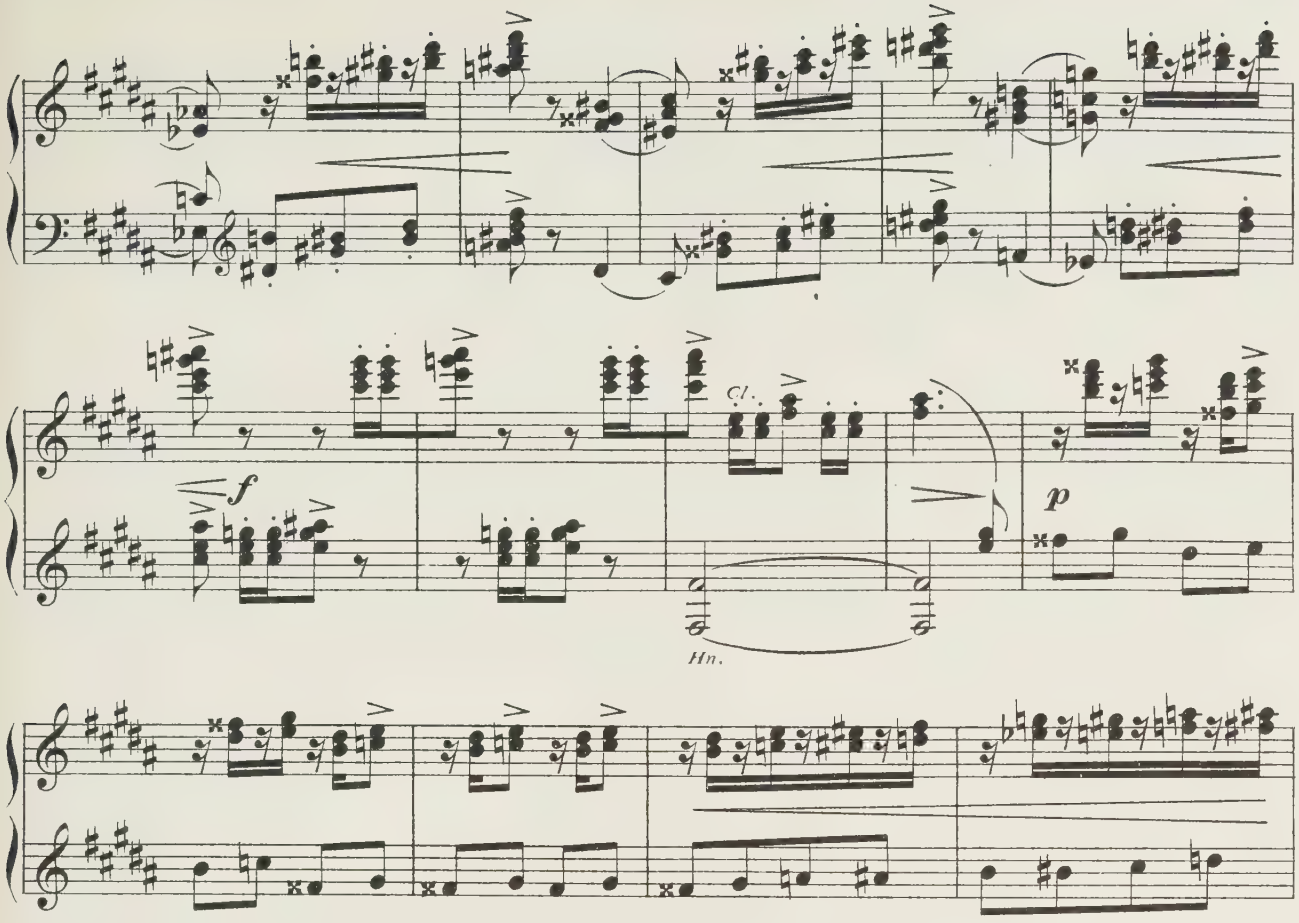
(The clouds disappear in part, disclosing the edge of the moon's bright disk. Manru moves about uneasily, without rising to his feet.)



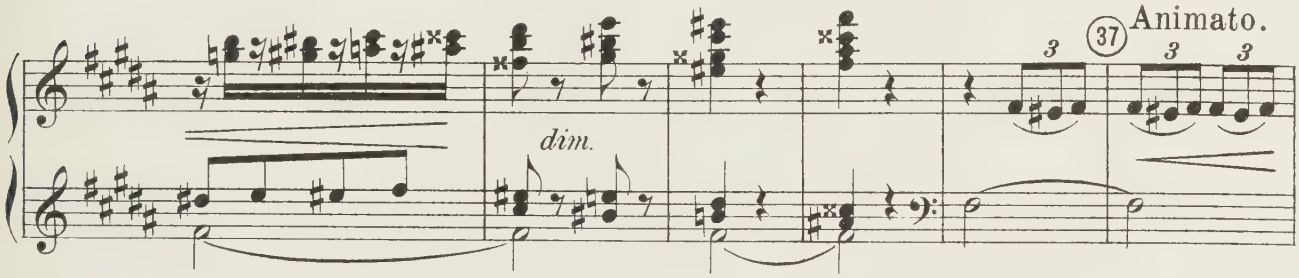


(More of the moon's disk becomes visible than before, and for a longer space. Manru again grows uneasy.)

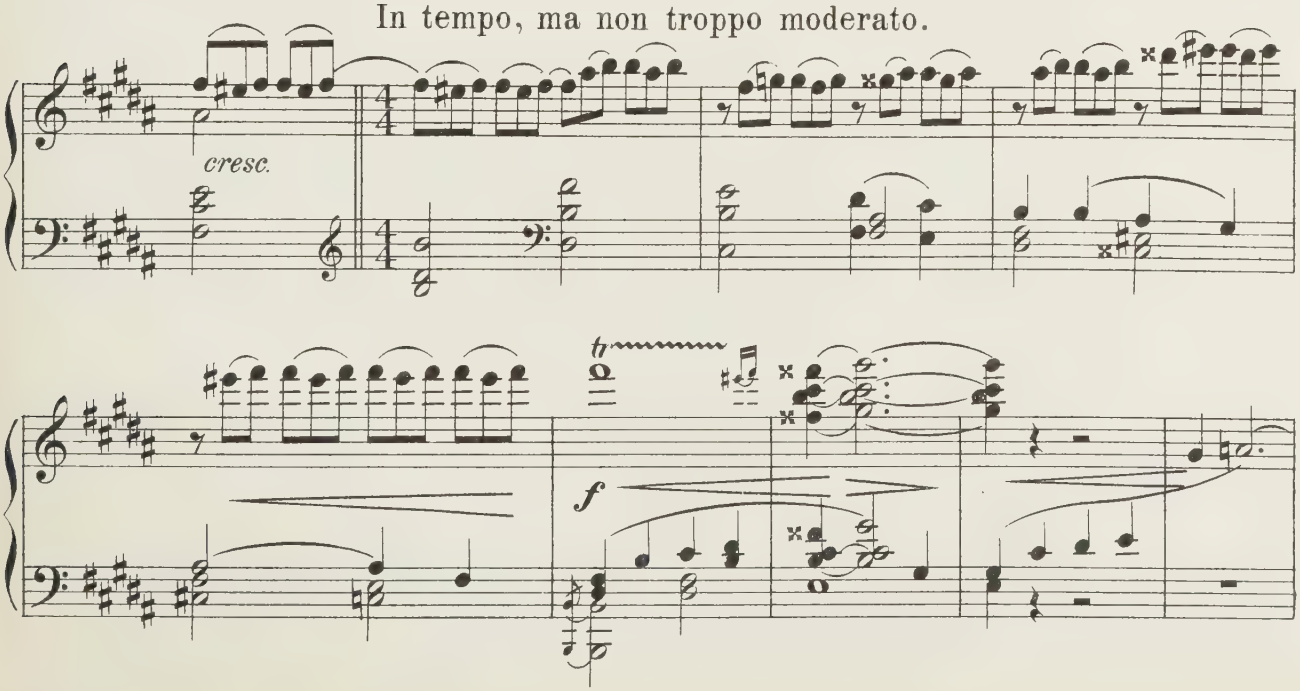




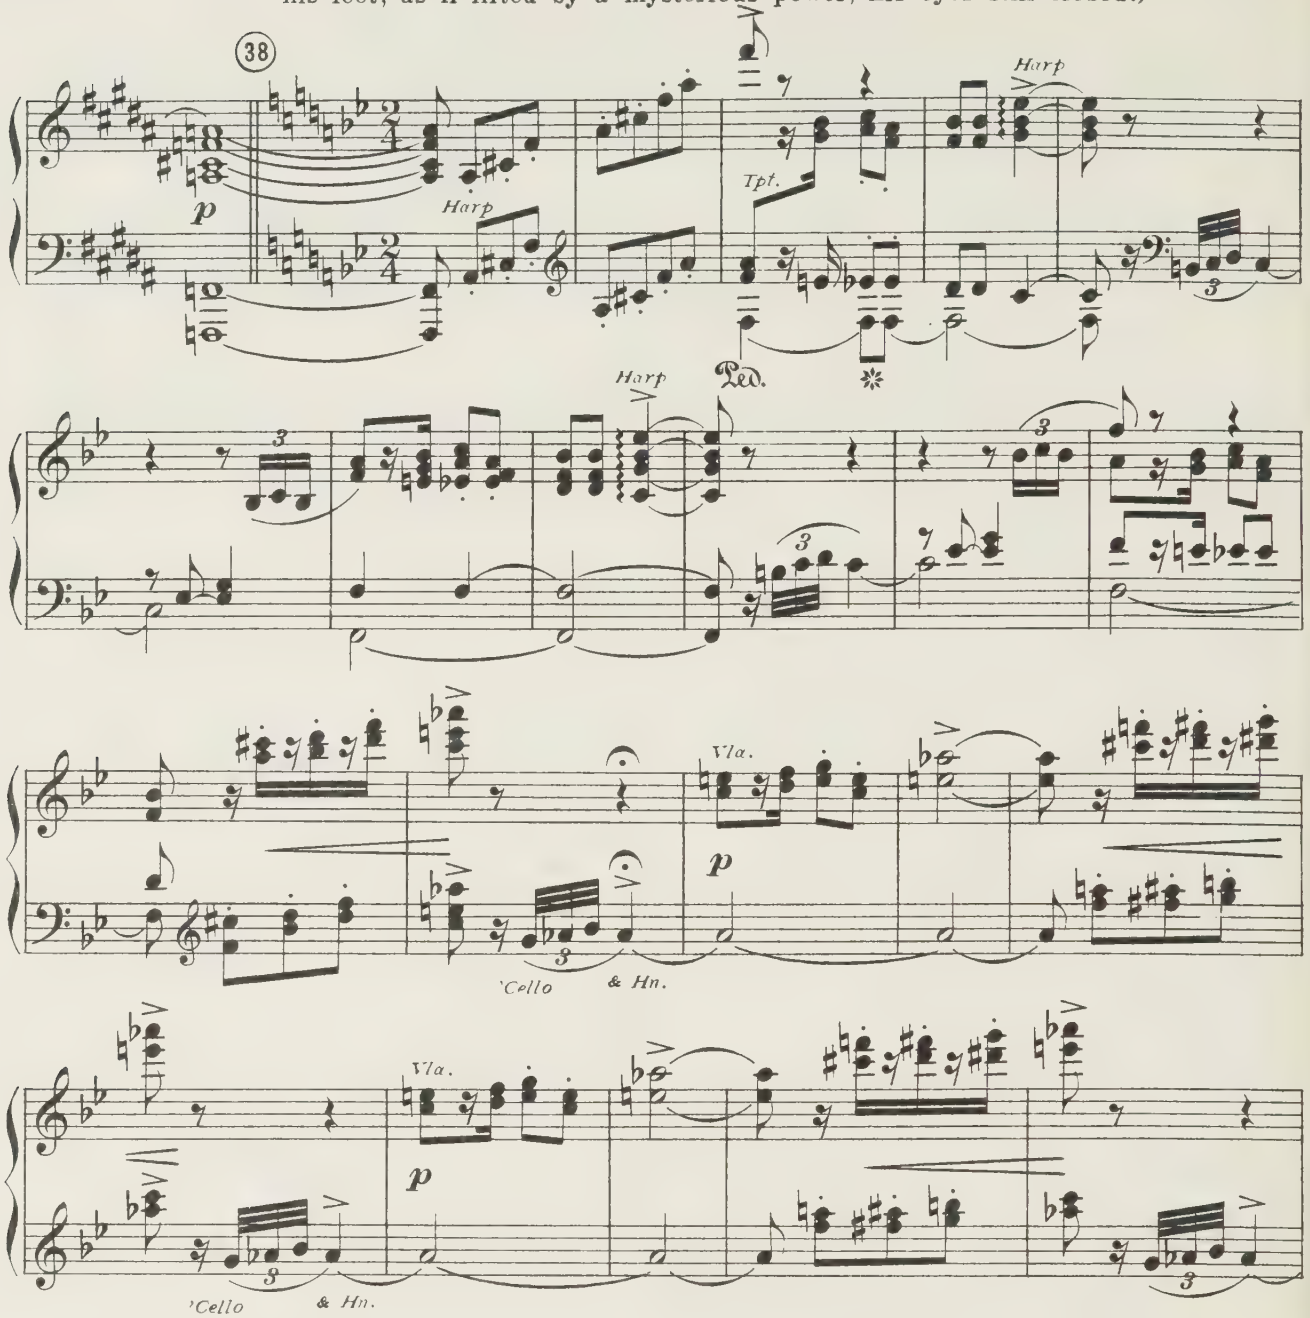
(The moon disappears, somewhat slowly, behind the cloud. Manru seems quieted.)



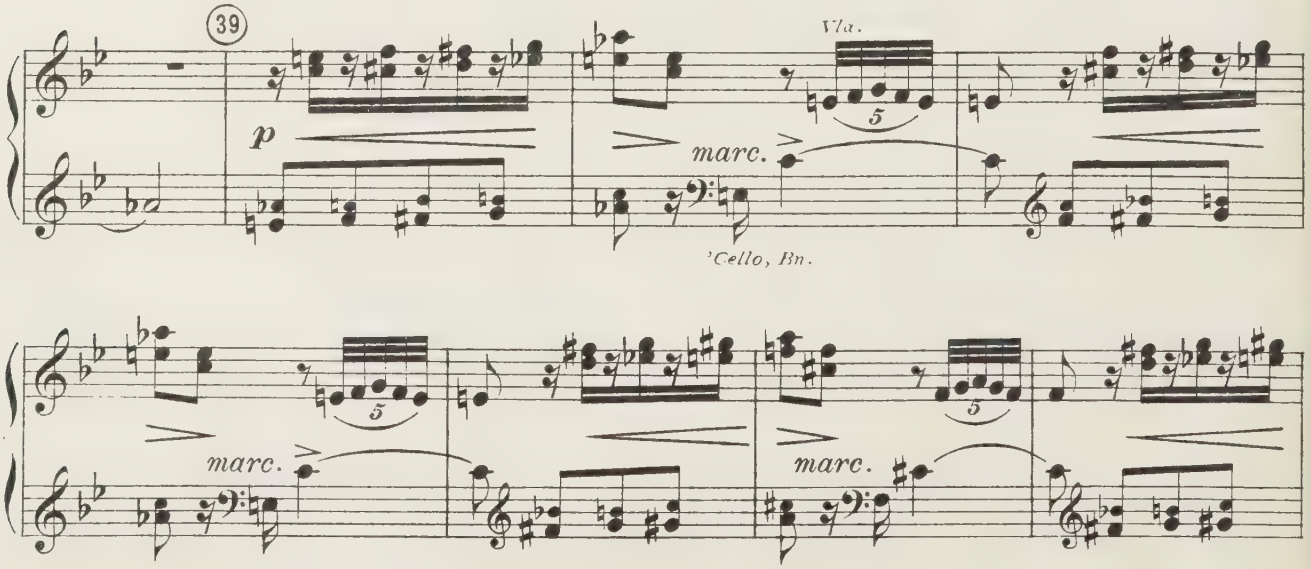
In tempo, ma non troppo moderato.

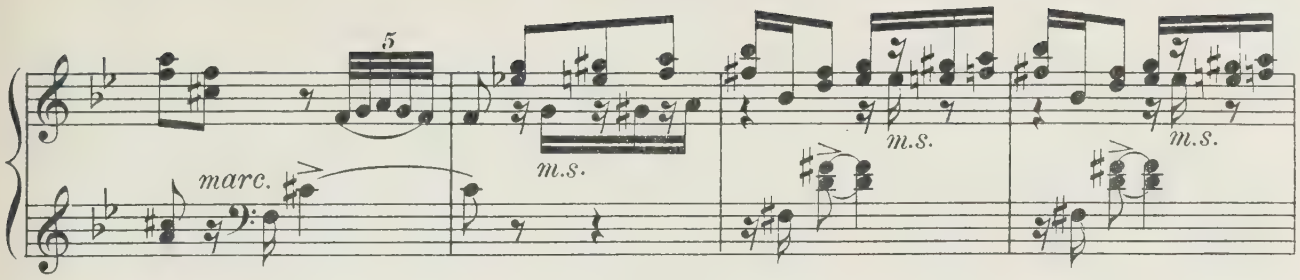


(The full disk of the moon appears in all its refulgence. Manru rises slowly to his feet, as if lifted by a mysterious power, his eyes still closed.)

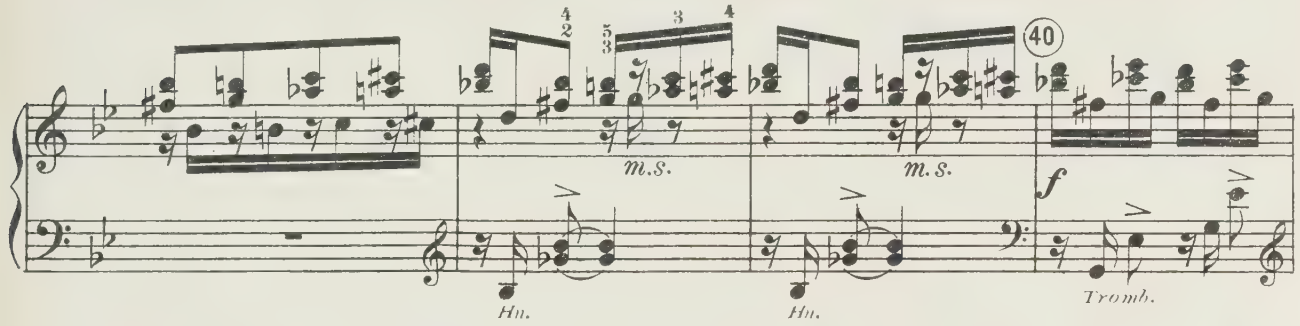


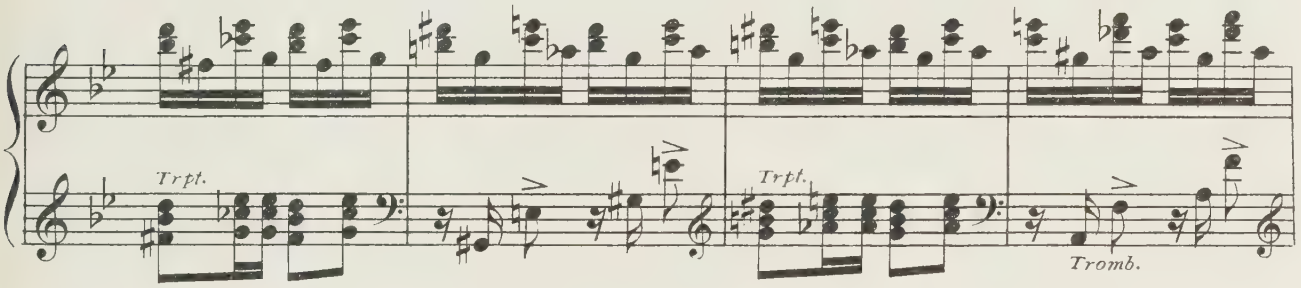
(With arms extended, his eyes still closed, Manru walks toward the mountains.)





(Dark clouds hide the moon, and gusts of wind presaging an approaching storm are heard.)





(Manru stumbles, and falls to the ground as if in a faint.)
